Rio de Janeiro, August 03, 2022 – Petro Rio S.A. ("PRIO" or "Company") (B3: PRIO3) presents its results for the second quarter of 2022 ("2022"). The financial and operating information described below, unless otherwise stated, is presented on a consolidated basis and in US dollars (US\$), in accordance with International Financial Reporting Standards (IFRS), and includes the Company's direct subsidiaries: Petro Rio O&G Exploração e Produção de Petróleo Ltda., Petro Rio Internacional S.A., PetroRioUSA Inc., and their respective subsidiaries and branches.

HIGHLIGHTS FOR THE PERIOD

Sales of approximately 3.3 million barrels and average production of 33.3 Mboepd

C Lifting cost of \$11.1, the lowest ever recorded

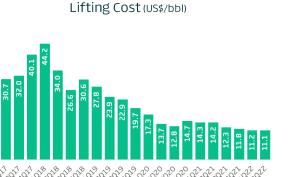

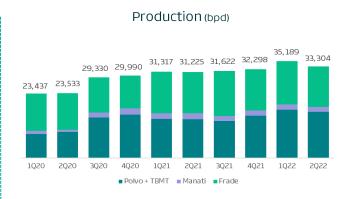

Signing of the acquisition of Albacora Leste in April

Acquisition of the West Capricorn drilling rig

First oil of the ODP4 and MUP3A wells in Frade in July, with production totaling 18.5 kbpd

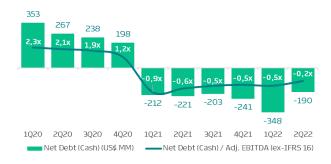

8 Several new ESG initiatives

Cash Position (US\$ million) 906 832 833 1,149 1,252 127 113 136 170 832 833 1,149 1,252 128 2020 3020 4020 1021 2021 3021 4021 1022 2022

Net Debt (Cash) / Adjusted EBITDA

MESSAGE FROM MANAGEMENT

2022 was marked by great work by our team, achieving stellar performance, with the highest standards of operational safety and care for society and the environment. Once again, we demonstrated effective cost control, which, in addition to the sale of 3.3 million barrels of oil and high commodity prices, led PRIO to record revenues of US\$ 377 million and record adjusted EBITDA of US\$269 million.

In April, we started the Frade Revitalization Plan, which has been carried out in a safe and efficient manner, leading to an increase of over 50% of PRIO's consolidated production.

The first well of the Revitalization Plan, the ODP4 well, was constructed in 68 days, including drilling, completion and connection to the Valente FPSO. This brought a significant decrease in the well's cost, with a reduction of about 30% compared to the original forecast. The results were even better: 15,000 bpd of initial production, stable throughout July, practically doubling the Field's output. Then, in less than 30 days, we constructed the MUP3A well, with initial production of 3,500 bpd and the lowest well cost in Frade, using the existing borehole of a well that was not producing.

Consequently, PRIO's current oil production reached 52,000 bpd and we expect a significant decrease in lifting cost over the next few quarters.

During the period we also signed the contract for the acquisition of 90% of the Albacora Leste Field from Petrobras, adding 244 million barrels of 1P reserves. The transaction was approved by the Brazilian antitrust entity (CADE) on June 20th, when we started the transition process. The field will initially add around 27,000 bpd for PRIO, in addition to a significant schedule of investments to increase production and efficiency throughout 2023 to 2025.

In June, we acquired the West Capricorn rig, which will fulfill PRIO's rig needs for the next few years. The acquisition guarantees the availability of a sixth-generation rig, with operating costs significantly below what we currently see practiced in the market. With the experience of operating the Kingmaker rig, we see this asset as another way to ensure lower costs and stability to our operations.

We also recently announced the issuance of R\$ 2 billion in debentures, which will be used to finance the Frade Revitalization Plan. The issuance will provide PRIO with another long-term source of capital, with a duration of over 5 years and at competitive costs. Therefore, we continue to strengthen our capital structure and cash position to fund our future investments.

On the environmental front, we engaged Witt O'Brien's to support us in measuring our carbon emissions, which will be later certified by KPMG, marking an important step in environmental monitoring and information transparency. At the same time, we started working with NINT to publish a sustainability report in early 2023, further disclosing more information on emissions, water use and waste treatment, as well as setting targets for improving environmental indicators. We are committed to demonstrating how we have reduced emissions over time through the efficiency of our operations, an integral part of the Company's strategy.

On the social area, we would also like to highlight the success of one of the projects we are most proud to support, called Reação Offshore, the program established by the Reação and Todos na Luta Institutes to train technicians and high school graduates to work in the offshore market. The program had almost 5,000 applicants and is already past the first phase, with almost 200 candidates selected.

Internally, we are bolstering initiatives to support physical and mental health, promoting and encouraging our employees to participate in initiatives such as the first Rio Night Run of 2022, treks, stretching and physical therapy sessions, meditation and yoga classes and shiatsu sessions both offshore and at headquarters, in addition to improvements in the offshore wellness facilities. We believe that our employees' holistic well-being is a key component of their superior performance and of the Company's culture, and we will continue our efforts to assure that these initiatives are at everyone's disposal.

Finally, we would like to thank all our employees and stakeholders for their effort and discipline in achieving these important milestones, and we are very excited about the next steps of these projects.

OPERATING PERFORMANCE

	2Q21	3Q21		4Q21	1Q22	2Q22	2Q22 X 2Q21	2Q22 X 1Q22

PRIO	14.2	12.3		11.8	11.2	11.1	-21.7%	-0.8%

² With the completion of the tieback on July 14, 2021, PRIO's interest in the **Polvo** and **Tubarão Martelo** fields increased from 100% and 80%, respectively, to 95% in the two fields.

The main operating highlights for the quarter include: (i) lifting cost, which once again reached the lowest level ever recorded, with a decrease of 22% compared to 2Q21 and practically stable compared to the previous quarter; and (ii) the amount of offtakes for the period, 18% higher than those recorded in 2Q21, which, coupled with the increase in Brent prices, significantly contributed to the increase in the Company's revenue in the quarter.

In the quarter, PRIO sold 3.3 million barrels, an increase of 18% when compared to 2Q21, in five offtakes, one in April, two in May (in a co-load regime, a blend of **Frade** and **Polvo + TBMT** oils) and two in June, totaling 1.5 million barrels sold in **Frade** and 1.8 million barrels in the **Polvo and TBMT** cluster, with average gross sales price of US\$ 108.37, close to 1Q22.

In the **Polvo** and **TBMT** cluster, the volume produced in the quarter was 19% higher than that recorded in the same period of the previous year, due to the start of production of the TBMT-10H well in October 2021.

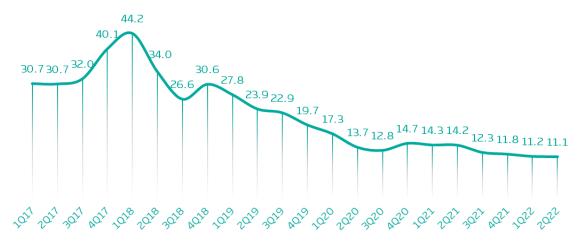

The volume produced in **Frade** was 1.2% lower when compared to 2Q21 and 6.2% lower than in the immediately previous quarter. The decrease is mainly explained by scheduled subsea activities and the interruption of the OUP1, OUP2 and OUP3 wells, during the connection of the ODP4 well, the first producing well of the **Frade** Revitalization Plan.

Since the beginning of the Company's turnaround, which consolidated its growth strategy through the acquisition and development of producing assets, PRIO has been working to increase its production levels and rationalize its costs, always maintaining excellence levels in environmental responsibility, safety and operational efficiency. PRIO truly believes that the best protection against Brent volatility is the reduction of its lifting cost, and this will continue to be a pillar for current and future projects. The Company presents below the evolution of its lifting cost since the beginning of 2017.

PRIO Lifting Cost

(US\$/bbl)

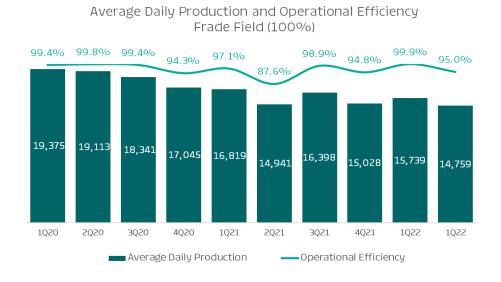

The lifting cost in 2Q22, the lowest ever recorded by the Company, presented a decrease of approximately 22% when compared to the same quarter of the previous year. Despite the decrease in production when compared to 1Q22, the lifting cost was 1% lower, demonstrating PRIO's pursuit of cost optimization each quarter. The main driver for this was the start of production of the TBMT-10H well in October 2021, which added a daily production of approximately 3 kbpd. The Company expects that the lifting cost will continue to be reduced in the future, with the start of production of the new Frade producing wells.

FRADE FIELD

The operational efficiency of the field reached 95.0%, a decrease from the the first quarter of 2022 mainly due to well interruptions to connect the ODP4 well, the first producing well of the **Frade** Revitalization Plan. Field production closed the quarter at an average of 14.8 kbpd, and the decrease can be mainly explained by the following factors: (i) scheduled subsea activities, and (ii) the interruption of the OUP1, OUP2 and OUP3 wells, during the commissioning of the ODP4 well. The chart below illustrates the history of average daily production and operational efficiency in recent quarters:

On July 7, PRIO informed the market of the start of production at the ODP4 well in the **Frade** Field, with initial production of approximately 15,000 barrels of oil per day, significantly above original projections, doubling the Field's production and increasing the Company's production by 45%, to 48,500 barrels of oil per day.

The ODP4 well, the first of **Frade**'s Revitalization Plan, was concluded in 68 days, substantially lower than the expected time, resulting in a 30% cost reduction for the well's construction and subsea connection.

Due to the lower cost and execution time of the ODP4 well, PRIO decided to anticipate the drilling of a second producing well that was scheduled for the second phase of the **Frade** Revitalization Plan, the MUP3A well. Although this new well has lower production (approximately 3,500 bpd), it also had significantly lower CAPEX (US\$ 22 million), since the MUP3 well's subsea structure, which no longer produces, was used.

Therefore, the first phase of **Frade**'s Revitalization Plan now includes 4 wells (2 producers and 2 injectors), and the CAPEX relating to this phase will remain the same as initial estimates.

The **Frade** Field Revitalization Plan seeks to increase the asset's recovery factor and meets the ANP's conditions for the extension of the concession until 2041, as disclosed in the ANP's approval of the Field's Development Plan. The overall project considers the drilling of four production wells and three injectors, selected to maximize the field's recovery factor.

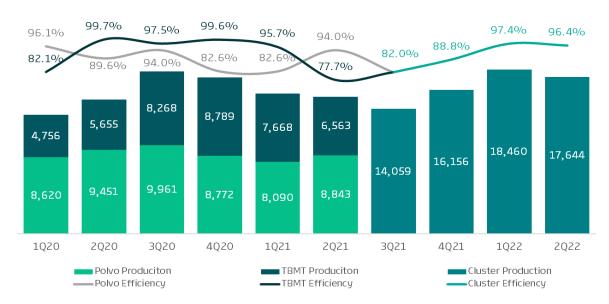

POLVO AND TBMT CLUSTER

In 2Q22, the **Polvo and TBMT** cluster recorded average daily production 19% higher than in 2Q21. However, when compared to 1Q22, the cluster presented 4% lower production, which can be explained by: (i) a two-day shutdown of the TBMT-8H well; and (ii) a failure in the energy generation system, which is still undergoing adjustments to seek maximum efficiency.

The cluster's operational efficiency quarter was approximately 96%, which although lower than the previous quarter, is still within expected standards for the cluster. The cluster's high efficiency in the quarter reinforces the Company's commitment to maintaining high operational standards. The chart below illustrates field production and efficiency as of 2020:

Average Daily Production and Operational Efficiency Polvo + TBMT Cluster (100%)

On June 17 and July 8, 2021, PRIO announced the completion of the acquisitions of 35.7% and 28.6% interests in the **Wahoo** Field, respectively.

With the transactions, PRIO currently holds 64.3% of the Field, and aims to create a second production cluster through the tieback of **Wahoo** to **Frade**, thus continuing the strategy of operational optimization of its assets. **Wahoo's** first oil is planned for early 2024.

Wahoo, with oil discovery in 2008 and formation testing performed in 2010, has the potential to produce approximately 126 million 1P barrels (100% of the field), according to the DeGolyer & MacNaughton ("D&M") Reserve Certification Report. The Company estimated an initial average productivity of approximately 10,000 barrels per day per well, and a total production that will reach 40,000 barrels per day, according to the results of the formation test performed in an exploratory well.

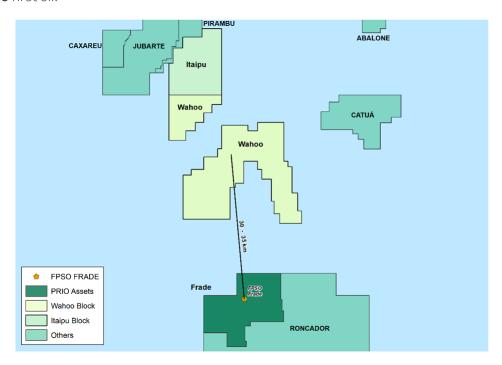

The **Wahoo** base project covers the drilling of four production wells and two injection wells, as well as the tieback between the wells and the **Frade** FPSO. The initially estimated CAPEX for the whole project is broken down into US\$ 300 million for the tieback, US\$ 360 million for well drilling, US\$ 100 million for subsea equipment and US\$ 40 million for adjustments to the **Frade** FPSO and other items.

On December 22, 2021, PRIO filed the Declaration of Commerciality of the **Wahoo** discovery (located in Block CM-101) and the Development Plan under an exclusive operation regime with the ANP, which are currently under analysis.

In the second quarter of 2022, PRIO advanced in the final negotiations for the purchase of the structures that will be used in the project. As of August, the acquisition of equipment for wells, topside and subsea should begin, aiming to comply with the schedule for the **Wahoo** first oil at the beginning of 2024.

Finally, the next steps in **Wahoo's** development are as follows:

- 1) Approval of the Development Plan;
- 2) Start of the drilling and tieback project;
- 3) Wahoo first oil.

On April 28, PRIO signed a Sale and Purchase Agreement with Petróleo Brasileiro S.A. ("Petrobras") for the acquisition of a 90% interest and operation of **Albacora Leste** Field.

Thus, the new consortium will be formed by PRIO, operator of the Field with a 90% interest, and Repsol Sinopec Brasil ("RSB"), with a 10% interest. The deal is subject to the usual precedent conditions for this type of operation, such as approval by the National Agency of Petroleum, Natural Gas and Biofuels ("ANP").

The payment will have a fixed price of US\$ 1,951 million, of which US\$ 293 million was paid upon execution of the agreement, and a further US\$ 1,658 million will be paid upon completion of the acquisition and transfer of the operation to the Company, subject to adjustments until the closing of the transaction (counted from October 1, 2022) and to the fulfillment of precedent conditions.

The deal also includes the possibility of (cumulative) additional payments of up to US\$ 250 million, depending on the annual average price of a barrel of Brent oil for the years 2023 and 2024, as presented in the table below:

	2023			Total	20	Total	
Brent (US\$/bbl)	70	80	90	-	65	70	-
Payment (US\$ MM)	10	45	45	100	75	75	150

All amounts will be paid using currently on hand, as well as the Company's cash generation until the closing of the transaction. Leverage levels will remain within healthy and conservative ranges, close to 0.5x Net debt / EBITDA.

Albacora Leste is located at a water depth of 1,200 meters, in the north of the Campos Basin, 23 km from the **Frade** field.

The **Albacora Leste** Field has 1P reserves of 279 million barrels, with a net reserve to PRIO of 244 million barrels, and is expected to be abandoned after 2050, according to the reserves certification report, prepared by DeGolyer & MacNaughton ("D&M"), dated October 1, 2022. Estimates consider a long-term price of US\$ 62 per barrel of oil.

On May 30, 2022, the Company received the waiver from Repsol Sinopec Brasil ("Repsol"), one of the precedent conditions for the conclusion of the deal, and on June 20, 2022, the Brazilian antitrust entity (CADE) approved the transaction, initiating the transition process.

MANATI NATURAL GAS FIELD

The volume of liquid gas sold in 2Q22 was 1,783 boepd, 19% lower than in the same quarter of 2021 and 5% lower than in 1Q21. This decrease was due to a scheduled shutdown in the field in June.

Operating cost, comprising direct costs, net of depreciation, was US\$ 0.9 million in 2Q22, accounting for a decrease of 27% (from US\$ 1.3 million in 2Q21 to US\$ 0.9 million in 2Q22) in costs. Other US\$ 0.5 million were paid as royalties and special interests for the rights to explore the asset in the first quarter of 2022.

The investment in the acquisition of **Manati**, carried out in 2017 for approximately R\$ 116 million (US\$ 37 million at the time), had a payback of 2 years. On November 5, 2020, the sale of the 10% interest held by the Company in the Manati Field for R\$ 144.4 million was announced. However, in a Material Fact published on April 19, 2022, The Company announced the termination of the SPA, once the long stop date had been reached with no satisfaction of the conditions precedent.

PRIO remains confident on the Field's future, especially given the recent gas market outlook. Nevertheless, it does not preclude possible further transactions involving Manati.

PRIO

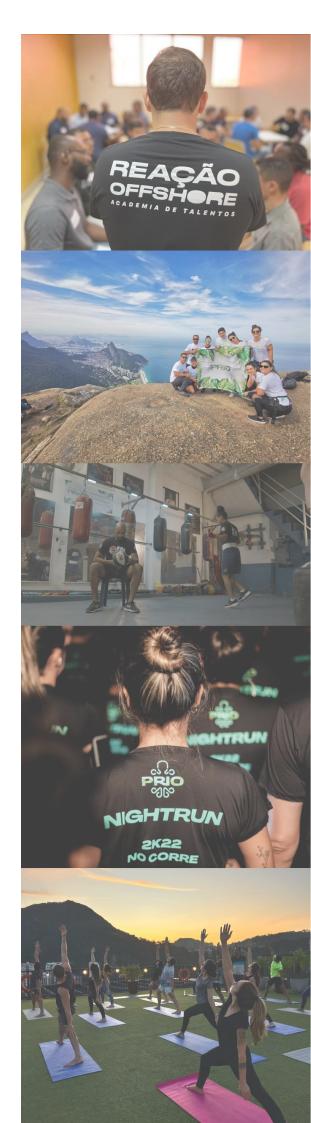

The Company has always believed in a strong alignment between reducing its carbon footprint and its operational strategy, involving increasing efficiency, asset consolidation and postponing field abandonment expectations.

This is why PRIO has taken an important step, beginning the project that will help to structure, certify and endorse environmental indicators, with the support of consulting firms. The Company has hired Witt O'Brien's to help correctly measure emissions and subsequently certifying those emissions with KPMG. Furthermore, the Company is also actively working with the consulting firm NINT to prepare its Sustainability Report, which is expected to be published in the first quarter of 2023, which will comply with the highest market standards and practices.

The second quarter of 2022 was also important due to the positive result of the Reação Offshore project, of Reação and Todos na Luta Institutes, in partnership with SENAI, which will empower both technicians and non-technicians, in addition to providing socioemotional support. The goal of the project is to qualify young people towork in the offshore oil and gas sector. There were 4,700 applications for the technical level, with the selection of 190 people, for the beginning of the four weeks of classes at the end of July.

Still in the social area, believing in the power of giving back to society, the Company supports several projects such as Casa Irmã Dulce, Neojiba Orchestra, the Favela Brass project and the restoration of Umberto Primo Hospital, in addition to Instituto Todos na Luta, an NGO which teaches boxing classes to children and young people in vulnerable situation, reinforcing PRIO's belief in the transformational power of education and sports in the training of future professionals.

Internally, PRIO is still promoting and encouraging its employees to participate in its extensive Wellness Program, strengthening even more the activities offered, such as the Night Run 2022, trekkings, stretching and physiotherapy sessions, meditation and yoga classes and shiatsu sessions both offshore and at the headquarters, improvements in the offshore wellness facilities, in addition to access to online nutritionists and psychologists.

FINANCIAL PERFORMANCE

PRIO presents below the financial performance with and without the impact of changes in IFRS 16, as well as statatements of non-cash and non-recurring accounting entries and their impacts on the financial statements when presented in US Dollars.

In the quarter, the main factor that impacted PRIO's financial performance was the increase in revenue, reflecting the increase in sales and the rise in the Brent price, which reached US\$ 123.58 per barrel in June. As a result, PRIO recorded net revenue of US\$ 377 million in the quarter, accounting for an annual increase of 95% and an Adjusted EBITDA (ex-IFRS-16) of US\$ 269 million, 122% higher, both reflecting price and offtakes growth.

Stock cost (US\$ thousand)	72,688	38,753	27,741	-61.8%	-28.4%
Frade Field	23,626	12,377	7,666	-67.6%	-38.1%
Polvo and TBMT cluster	49,063	26,376	20,075	-59.1%	-23.9%

Analyzing the quarterly revenue, the **Frade** field and the **Polvo + TBMT** cluster accounted for 43.4% and 55.1% of the Company's total revenue, respectively. In turn, the **Manati** natural gas asset contributed net revenue representing 1.5% of the total, referring to PRIO's 10% interest in the natural gas consortium. The chart below shows each asset's share in the Company's total net revenue:

Revenue per asset

The Cost of Goods Sold ("COGS") totaled US\$ 63 million in the period, an increase of 33% in 2Q22 compared to 2Q21 (ex-IFRS 16), mainly influenced by (i) the increase in production and sales, which, compared to the same period of the previous year, showed 7% and 18% growth, respectively, and (ii) the volume of sales proportionally higher in the **Polvo + TBMT** cluster, which has slightly higher lifting cost than **Frade**.

The Company recorded Operating Income (ex-IFRS 16) in 2Q22 of US\$ 249 million, an increase of 127% when compared to the previous year, as a result of higher revenues from **Frade** and **Polvo and TBMT**, due to the increase in oil prices, production and sales.

General and administrative expenses, including expenses with M&A, personnel, projects, geology and geophysics, totaled US\$ 14 million in the quarter, accounting for an increase of 53% when compared to 2Q21, due to the increase in expenses with sponsorships of social projects and bonus payments.

Other operating revenues (expenses) totaled a negative US\$ 20 million in the quarter, 70% higher than in 2Q21, due to expenses with the return of the Ceará Block.

Adjusted EBITDA (ex-IFRS 16) reached US\$269 million, 122% higher than the previous year, driven by the expressive growth of the operating income.

The Company's financial result (ex-IFRS 16) was negative by US\$ 36 million vs. positive US\$ 19 million in 2Q21, negatively impacted by interest expenses on loans and financing, the exchange rate variations on cash, financial applications and taxes, as well as the impacts of interest and exchange rate changes on the provision for abandonment.

Net income (ex-IFRS 16) for the period was US\$ 140 million, accounting for an increase of 112% versus that recorded in 2Q21. Income was strongly impacted by the increase in income tax, as this is impacted by the increase in revenue.

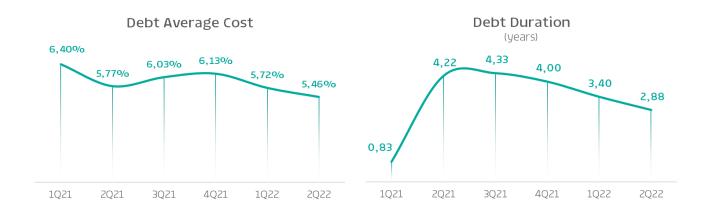

CASH, DEBT AND FINANCING

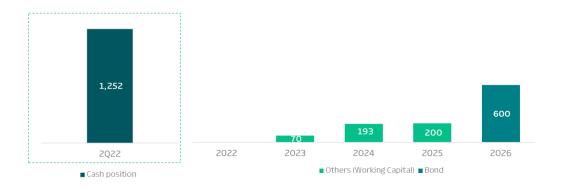

PRIO has been consistently monitoring its liquidity and leverage level. In the second quarter of 2022, the Company issued four new working capital debts. The objective of raising new debt was to reach a position of greater liquidity, considering the investments required for the **Frade** Redevelopment Plan, the **Wahoo** development and the already announced acquisition of **Albacora Leste** and potential new assets.

PRIO continues to reinforce its cash position and capital structure. The debt issued throughout 2Q22, with an average term of more than two years, helped to reduce the average cost of debt, keeping duration within an adequate term for PRIO's future projects. This financial planning strategy makes the Company more prepared for inorganic growth, an important growth pillar. The effort to issue debentures, to be completed in August 2022, provides funding of approximately US\$ 380 million, with a weighted average duration of 5.5 years and an average cost of 6.8% in dollars. Thus, the Company continues to reinforce its cash position for its future investments.

Amortization schedule

(US\$ million)

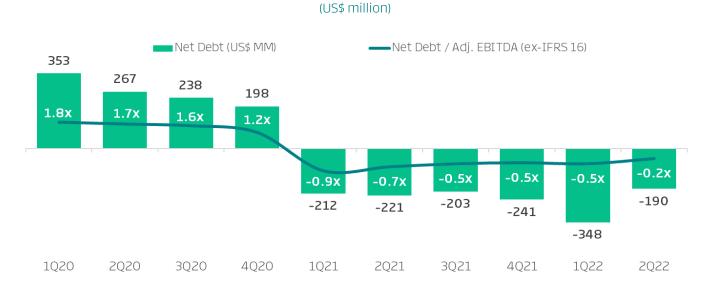

NET CASH AND LEVERAGE

In the second quarter of 2022, PRIO's net cash position decreased by US\$ 158 million, impacted by the following:

- **Wahoo and Albacora Leste**: payment of the last tranche of the **Wahoo** acquisition from BP (US\$ 37.5 million) and an advanced payment of **Albacora Leste** in the amount of US\$ 293 million to Petrobras;
- CAPEX: expenses with the **Frade** Revitalization Plan, inventory of materials in **Frade** and start of disbursement for the **Wahoo's** development.

ANNEX 1

IFRS 16

The Company incorporated the rule change provided for in IFRS 16 on January 1, 2019. The change unifies the treatment of operating and finance leases, significantly impacting the Company's balance sheet, mainly through the chartering of support vessels used in operations, which represents the largest lease agreement:

Right-of-use assets	Balance
FPS0	
Support Vessels	139.505
Helicopters	8.126
Buildings/Support Bases	15.672
Equipment	13.908
Total	177.211

As announced on February 2, 2020, the Company acquired the FPSO **Bravo**, which is used in the production system of the **Polvo** and **Tubarão Martelo** fields, in place of the FPSO that was chartered and used before the tieback project between the two fields was completed. The dollar-denominated contracts in force since the beginning were discounted at rates of 5.63% p.a., recalculated to 5.90% p.a. when the useful life of the Polvo Field increased. Contracts in reais are discounted at the rate of 10% p.a. For a dollar-denominated contract for a vessel that entered 2020, in dollars, the discount rate used was 8.95% p.a., and for two contracts that entered in the first quarter of 2022, both in dollars, the rate used was 4.45% p.a., the average of loans contracted in the period.

About PRIO

PRIO is the largest independent oil and natural gas production company in Brazil. The Company's corporate culture seeks to increase production through the acquisition of new production assets, redevelopment, greater operational efficiency and reduction of production costs and corporate expenses. Its main objective is to create value for its shareholders by means of high financial discipline and preserving its liquidity, with full respect for safety and the environment. For more information, access the website: www.prio3.com.br.

Legal Notice

All statements, except those relating to historical facts contained herein, are forward-looking statements, including, but not limited to, statements about drilling plans and seismic acquisitions, operating costs, equipment acquisition, expected oil discoveries, the quality of the oil we hope to produce and our other plans and objectives. Readers can identify many of said statements by reading words such as "estimates", "believes", "expects" and "will" and similar words or denials thereof. Although management believes that the expectations represented in such statements are reasonable, it cannot assure that such expectations will happen. By their nature, forward-looking statements require us to make assumptions and, as such, such statements are subject to inherent risks and uncertainties. Readers of this document are cautioned not to place undue reliance on our forward-looking statements considering that certain factors could cause results, conditions, actions or events that could materially differ from the plans, expectations, estimates or intentions expressed in the forward-looking statements and the assumptions that support them. The forward-looking statements herein are based on the assumption that our plans and operations will not be affected by such risks, but that if our plans and operations are affected by said risks, the forward-looking statements may become inaccurate. The forward-looking statements included herein are expressly fully qualified by this legal notice. Such statements were made as of the date of this document. We do not undertake to update such forward-looking statements, except as required by applicable securities laws.
